

Choosing a size

An ideal time to start using a grobag® baby sleeping bag is when your baby weighs more than 7 lbs (0–6 months size). It is very important to check that your baby's head cannot pass through the neck-hole when the grobag® baby sleeping bag is fastened for use. Please remember that these are recommendations only as all babies are different.

Bag Size	Child Weight	Child Length
0–6 months	7–17 lb	up to 27"
6–18 months	18–24 lb	28"–34"
18–36 months	25 lb +	35"–39"

Make sure that your baby's legs and feet have freedom to move about by ensuring that the grobag® baby sleeping bag is long enough for your baby. The lengths of grobag® baby sleeping bags (from shoulder to bottom of the bag) are:

Age	Size
0–6 months	30"
6–18 months	37"
18–36 months	44"
